	GND	Black	To Battery Negative or Car Ground
	ACC	Yellow	To Positive Supply when IGN is on
	Relay	Green	N/A
Additional Camera	Camera		Monitor Cabin/Reverse Camera

### 1.2 Wiring Diagram

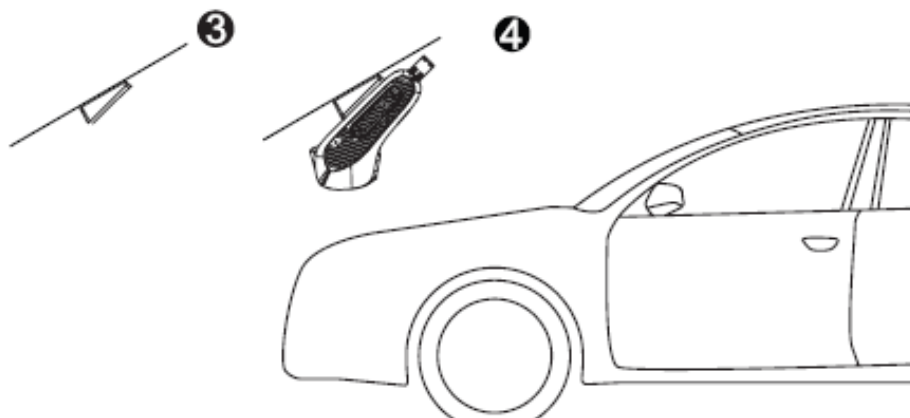

## 1.3 Installation Guide

1. Locate fuse box within the vehicle cabin.
2. Where possible make connections using fuse taps.
3. Route the power cable along the A pillar of the vehicle to the upper center of the front windshield.

## 1.4 Mounting the Dash Cam

Select a proper installation position and wipe the position clean using alcohol to ensure good adhesion with the 3M tape (It is recommended to mount the camera on the left of the rear-view mirror). Remove protective file from the 3M tape on the mounting base and attach it to the position. Mount camera onto the base plate and connect power cables.

## 2. Commissioning and WiFi Kit App

### 2.1 Downloading WiFi Kit App

Download the Wi-Fi kit app for your respected device to check camera position and make sure camera is recording.

Apple

Android

**Android** [https://play.google.com/store/apps/details?id=com.gpstrack.wifikit&hl=en\\_AU](https://play.google.com/store/apps/details?id=com.gpstrack.wifikit&hl=en_AU)

**Apple** <https://apps.apple.com/us/app/wifikit/id6471400094>
